

# *Chez Pierre*

Presents ...

Friday, October 25, 2024

11:00 am -12:00 pm

Duboc Room – 4-331

## **Special Chez Pierre Seminar**

**Ady Stern (Weizmann Institute)**

**"Novel quantized and unquantized composite fermion states".**

I will discuss two novel manifestations of composite fermions physics - the half-filled Chern band and the daughter states of the quantized half-filled Landau level.

My talk will assume **NO PRIOR KNOWLEDGE** of composite fermions.
